

STOWE ELECTRIC DEPARTMENT
PO BOX 190 | 435 MOSCOW ROAD
STOWE, VT 05672

TOWN OF STOWE ELECTRIC DEPARTMENT INTERRUPTIBLE LOAD TARIFF

AVAILABILITY:

This tariff is available for three-phase primary voltage customers at either 34.5 kV or 12.47 kV for all non-residential purposes that have energy consumption over 50,000 kWh per month during the Winter Season (October - April).

INTERRUPTIBLE SERVICE:

Stowe shall have the right to interrupt all interruptible load, if in its sole judgment such an interruption is required in order to maintain its own system reliability, and that of the VELCO transmission systems which serves Stowe. Within this metered load, Stowe will allow up to 170 kW to be considered non-interruptible, for the duration of the Winter Season.

Stowe will communicate by telephone and can request to interrupt no more than 5 hours, up to twice a day, during the Winter Season, but no more than 10 interruptions a month. The customer will have 30 minutes to shed the requested reduction by Stowe. Stowe can interrupt loads down to the non-interruptible carve out of 170 kW when unacceptably low voltages or frequencies are detected. However, Stowe shall take every reasonable effort to preclude exercising this provision, and if exercised, it will allow interruptible loads to resume operations as soon as possible.

MONTHLY RATE FOR INTERRUPTIBLE LOAD:

Customer Charge: \$12,602.47 per month.

Energy Charge: During the Winter Season the interruptible kWhs shall be multiplied by the rates procured by Stowe. Energy rates under this tariff are based on Stowe's ability to procure a least cost contract based on load following, a mix of shaped block purchases with ISO-NE hourly Vermont Load Zone's Real Time

Locational Marginal Price or the ISO-NE hourly Vermont Load Zone's Real Time Locational Marginal Price to cover an interruptible load. All kWhs used between May and September shall be billed at the energy rate set forth in Stowe's Rate 25.

Transmission Charges: SED reserves the right to modify the monthly charges assessed under this tariff based on any increase or decrease in transmission costs, ISO RNS tariff, VELCO tariff or any regulatory authority of competent jurisdiction. During the Winter Season, interruptible load shall be assessed on the following components of Transmission Charges.

1. ISO-NE Regional Network Service (RNS) charge: ISO-NE rate for the billing month multiplied by the interruptible load's coincident demand with VELCO's peak demand for the month.
2. VELCO 91 transmission charge: The ratio of interruptible loads Peak Demand Purchase (PDP) to Stowe's PDP multiplied by the monthly cost of service for VELCO 91.

Each month this line item will be billed using the VELCO 91 forecasted cost for the invoice month, as well as the variance of the actual and forecast for the prior month. The May invoice will contain the remaining variance from the month of April charges.

May through September these charges shall not apply, and interruptible load shall be billed at the demand rates and billing units set forth in Stowe's Rate No. 25.

3. ISO-NE Forward Capacity Market (FCM) charge: During the Winter Season, the charge shall be the monthly ISO-NE rate for each kW by which the interruptible load increases Stowe's peak for that month. Between May through September this charge shall not apply, and interruptible load shall be billed at the demand rates and billing units set forth in Stowe's Rate No. 25.
4. ISO Ancillary charges: including but not limited to ancillary costs tied to a load ratio share per ISO settlement, that result from actions taken by ISO-NE
5. Renewable Energy Standards (RES): service taken under this tariff is subject to Vermont's Renewable Energy Standard's annual credit requirements on a load basis per 30 V.S.A. § 8002-8005 *and set at current market prices per REC*

category.

MONTHLY RATE FOR NON- INTERRUPTIBLE LOAD:

170 kW non-interruptible load will be billed at Rate 25, each month of the year.

MINIMUM CHARGE:

The minimum charge shall be the customer charge.

DURATION OF CONTRACT:

Subject to termination upon notice unless a longer term is applicable under the Stowe Electric Department's terms and conditions.

TERMS AND CONDITIONS:

A condition of this rate class is to abide by the interruptible agenda by Stowe, and the payment terms are a Net-15. The above rates are billed monthly and due and payable upon presentation. Service taken under this tariff includes the terms and conditions of the Stowe Electric Department in effect from time to time.

LATE PAYMENT CHARGE:

A monthly penalty charge of 5% shall be assessed on all delinquent balances. The invoice will be determined late after the presentation of the monthly invoice. The charge will continue until the unpaid balance is brought to current.

EFFECTIVE:

Effective for service rendered on or after October 1, 2026.
